

MiniSOC - Incident Report

1. Executive Summary

This automated incident report was generated by MiniSOC on 2026-05-30 14:22:32. The system analyzed security logs and detected 1161 alerts using a combination of rule-based detection and machine learning anomaly detection (Isolation Forest). Immediate attention is required for 1113 CRITICAL severity alerts.

2. Key Metrics

Report Generated:	2026-05-30 14:22:32
Total Alerts:	1161
Critical Alerts:	1113
Medium Alerts:	48
ML Anomalies Detected:	225
Most Targeted User:	jane.smith
Top Attacking IP:	45.33.32.156
Primary MITRE Technique:	Brute Force

3. Top 10 Critical Alerts

Alert #1 - SOC-3D239E21

Time: 2026-05-26 01:01:58 | User: admin | IP: 45.33.32.156 | Country: CN
Reason: Known Malicious IP Detected: 45.33.32.156 | MITRE: T1110 - Brute Force
Action: Block IP immediately + Reset user password + Enable MFA

Alert #2 - SOC-36F5625F

Time: 2026-05-26 04:43:41 | User: admin | IP: 198.51.100.23 | Country: CN
Reason: Known Malicious IP Detected: 198.51.100.23 | MITRE: T1110 - Brute Force
Action: Block IP immediately + Reset user password + Enable MFA

Alert #3 - SOC-2FCC9727

Time: 2026-05-26 02:33:05 | User: admin | IP: 45.33.32.156 | Country: CN
Reason: Known Malicious IP Detected: 45.33.32.156 | MITRE: T1110 - Brute Force
Action: Block IP immediately + Reset user password + Enable MFA

Alert #4 - SOC-B8C6795A

Time: 2026-05-26 00:06:04 | User: root | IP: 103.21.244.0 | Country: CN
Reason: Known Malicious IP Detected: 103.21.244.0 | MITRE: T1110 - Brute Force
Action: Block IP immediately + Reset user password + Enable MFA

Alert #5 - SOC-C04BA77D

MiniSOC - Incident Report

Time: 2026-05-26 01:54:04 | User: root | IP: 198.51.100.23 | Country: CN

Reason: Known Malicious IP Detected: 198.51.100.23 | MITRE: T1110 - Brute Force

Action: Block IP immediately + Reset user password + Enable MFA

Alert #6 - SOC-FEFFFFC7E

Time: 2026-05-26 00:00:25 | User: deekshitha | IP: 185.220.101.45 | Country: CN

Reason: Known Malicious IP Detected: 185.220.101.45 | MITRE: T1110 - Brute Force

Action: Block IP immediately + Reset user password + Enable MFA

Alert #7 - SOC-09FF0D18

Time: 2026-05-26 03:07:53 | User: deekshitha | IP: 192.0.2.77 | Country: CN

Reason: Known Malicious IP Detected: 192.0.2.77 | MITRE: T1110 - Brute Force

Action: Block IP immediately + Reset user password + Enable MFA

Alert #8 - SOC-212DE8B0

Time: 2026-05-26 00:00:00 | User: root | IP: 45.33.32.156 | Country: KP

Reason: Known Malicious IP Detected: 45.33.32.156 | MITRE: T1110 - Brute Force

Action: Block IP immediately + Reset user password + Enable MFA

Alert #9 - SOC-6E4DC5E0

Time: 2026-05-26 04:24:49 | User: root | IP: 198.51.100.23 | Country: KP

Reason: Known Malicious IP Detected: 198.51.100.23 | MITRE: T1110 - Brute Force

Action: Block IP immediately + Reset user password + Enable MFA

Alert #10 - SOC-D2016011

Time: 2026-05-26 00:41:30 | User: admin | IP: 198.51.100.23 | Country: RU

Reason: Known Malicious IP Detected: 198.51.100.23 | MITRE: T1110 - Brute Force

Action: Block IP immediately + Reset user password + Enable MFA

MiniSOC - Incident Report

4. MITRE ATT&CK Techniques Observed

Brute Force:	754 occurrences
Credential Stuffing:	359 occurrences
Valid Accounts:	48 occurrences

5. Recommendations

1. Immediately block all flagged malicious IPs at the firewall level.
2. Force password reset for all targeted user accounts.
3. Enable Multi-Factor Authentication (MFA) for admin and root accounts.
4. Investigate after-hours login attempts with the respective users.
5. Review and update IP blacklist with newly detected malicious IPs.
6. Conduct a full audit of privileged account activity.
7. Consider deploying honeypot accounts to detect credential stuffing.

6. ML Anomaly Detection Summary

The Isolation Forest model analyzed 1501 log entries and flagged 225 as anomalous (15.0% anomaly rate). ML detection identified suspicious patterns in normal-looking login events that rule-based detection alone would have missed.

Avg Risk Score - after_hours_login: 70.08/100

Avg Risk Score - brute_force: 36.09/100

Avg Risk Score - credential_stuffing:21.31/100

Avg Risk Score - normal_login: 57.94/100
